AMENDMENTS TO THE CLAIMS:

Applicant respectfully requests that this listing of claims replace the prior versions of claims in the application.

1. (Currently amended) A method comprising:

associating one or more calendar notes with calendar profiles ~~of the~~in a terminal, each calendar profile defining a unique view to calendar content on the basis of the calendar notes associated with the calendar profile;

selecting in the terminal at least one calendar profile for generating calendar content to be shared;

generating the calendar content to be shared on the basis of at least one selected calendar profile and the one or more calendar notes associated with it by the terminal; and

~~sharing the generated calendar content to be shared~~establishing a connection between the terminal and ~~a remote device~~at least one user terminal for transmitting or loading the calendar content to be shared to the at least one user terminal.

2-3. (Canceled)

4. (Previously presented) The method as claimed in claim 1, further comprising generating the calendar content to be shared as defined by the selected user profile based on a remote device, user group, purpose of use or time of day.

5. (Currently amended) A communications system comprising ~~a terminal and~~at least ~~one remote device~~two user terminals, wherein [[the]]a first terminal is configured:

to associate one or more calendar notes with calendar profiles [[of a]]in the terminal, each calendar profile defining a unique view to calendar content on the basis of the calendar notes associated with the calendar profile;

2

to select in the terminal at least one calendar profile for generating calendar content to be shared;

to generate the calendar content to be shared on the basis of at least one selected calendar profile and the one or more calendar notes associated with it; and

to ~~share the generated calendar content to be shared~~establish a connection between the terminal and the ~~remote device~~second user terminal to transmit or load the calendar content to be shared to the second user terminal.

6-7. (Canceled)

8. (Previously presented) The communications system as claimed in claim 5, wherein the communications system is configured to generate the calendar content to be shared as defined by the selected user profile based on a remote device, user group, purpose of use or time of day.

9. (Currently amended) The communications system as claimed in claim 5, wherein the ~~remote device~~second user terminal is a media device, computer, PDA (Personal Digital Assistant) device or mobile station.

10. (Currently amended) A ~~terminal, wherein the terminal comprises a controller~~device configured:

to associate one or more calendar notes with calendar profiles [[of]]in the ~~terminal~~device, each calendar profile defining a unique view to calendar content on the basis of the calendar notes associated with the calendar profile;

to select in the ~~terminal~~device at least one calendar profile for generating calendar content to be shared;

to generate the calendar content to be shared on the basis of at least one selected calendar profile and the one or more calendar notes associated with it; and

to ~~share the generated calendar content to be shared~~<u>establish a connection</u> between the ~~terminal~~<u>device</u> and ~~a remote device~~<u>at least one user terminal to transmit or load the calendar content to be shared to the at least one user terminal</u>.

11-12. (Canceled)

13. (Currently amended) The ~~terminal~~<u>device</u> as claimed in claim 10, wherein the ~~terminal~~<u>device</u> is a mobile station, PDA (Personal Digital Assistant) device, portable computer or media device.

14. (Currently amended) A terminal, wherein the terminal comprises:

means for associating one or more calendar notes with calendar profiles [[of]]<u>in</u> the terminal, each calendar profile defining a unique view to a calendar content on the basis of the calendar notes associated with the calendar profile;

means for selecting in the terminal at least one calendar profile for generating calendar content to be shared;

means for generating the calendar content to be shared on the basis of at least one selected calendar profile and the one or more calendar notes associated with it; and

means for ~~sharing the generated calendar content to be shared~~<u>establishing a connection</u> between the terminal and ~~a remote device~~<u>at least one user terminal for transmitting or loading the calendar content to be shared to the at least one user terminal</u>.

15-16. (Canceled)

17. (New) The device of claim 10, wherein the device comprises a controller.
